Sujeet Kumar Prajapati

Senior Technical Lead

💼 11 Years 0 Month | 📱 (+91) 8904104289 | ✉ sujitprajapati557@gmail.com

📄 Profile Summary

Seasoned Java Backend Developer with 11+ years of experience in designing, developing, and delivering enterprise-grade applications using Java, Spring Boot, Microservices, and REST APIs. Strong expertise in backend development with AWS cloud integration and a solid understanding of frontend technologies like Node.js, JavaScript, AngularJS, and React.js. Adept at building high-performance, secure, and scalable systems, optimizing application performance, and ensuring operational excellence through monitoring and automation. Proven leadership skills in guiding teams, enforcing best practices, and delivering projects on time.

🅰 Education

B.Tech/B.E., 2013

Swami Vivekanand Institute of Technology

12th, 2009

Madhya Pradesh, Hindi

10th, 2007

🏛 Work Experience

Jun 2021 - Dec 2024

Senior Technical Lead

HCLTech

Highly skilled and dedicated Java Developer with over 9 years of experience in designing, developing, and deploying enterprise-level applications using Java, Spring Boot, and Microservices architecture. Proficient in working with various cloud services (AWS), messaging platforms (Kafka, ActiveMQ), and database technologies (Oracle, PostgreSQL, MongoDB). Expertise in building REST APIs, event-driven systems, and implementing efficient CI/CD pipelines using tools like Spinnaker, Gradle, and GitHub. Strong problem-solving abilities, committed to code quality and best practices with hands-on experience in testing frameworks like Mockito and JUnit. Demonstrated leadership in mentoring junior developers and collaborating with cross-functional teams to deliver scalable and high-performing solutions.

Key Skills:

Java 8, 11, 17 and 21 version, Spring Boot, Microservices Kafka, ActiveMQ, Redis Cache

🔧 Key skills

- Java
- Spring
- Spring Boot
- Microservices
- Hibernate
- Oracle SQL
- AWS
- Swagger API
- Maven Build
- Gradle
- GIT
- Bitbucket
- Splunk
- Confluence
- Bamboo CI
- MKS
- Kafka
- Tomcat Server
- Solr Integration
- IntelliJ Idea
- Eclipse IDE
- Spring AI
- Python
- Node.js
- Java Script
- Large Language Model

📝 Personal Information

City **Bengaluru**

Country **INDIA**

Hibernate, PostgreSQL, Oracle DB
CI/CD (Spinnaker, Gradle), Git, GitHub
Unit Testing (JUnit, Mockito)
Performance monitoring (Splunk, SonarQube)

Mar 2016 - Jun 2021

Technology Analyst

Infosys

I worked as a backend developer on the MM21 project, utilizing technologies such as Spring Boot, Microservices, Java 8, SQL Server, MongoDB, and ActiveMQ. My responsibilities included designing, developing, and optimizing backend services, as well as ensuring seamless integration with the front-end systems and databases.

Jun 2014 - Feb 2016

Software Engineer

Digital harbor pvt ltd

- Analyzed business requirements and delivered technical solutions to achieve a 15% increase in operational efficiency.
- Utilized MVC frameworks like Struts to construct the presentation layer and DAO for seamless SQL interaction.
- Developed Servlets classes and JSPs to enhance system functionality during the implementation phase.
- Implemented ANT automated build scripts for compiling and packaging the application, and integrated Log4j for efficient project logging, resulting in a 20% reduction in project deployment time.

Jan 2025 - Present

Manager

EY

- Working on LLM-based enterprise project focusing on LLM red teaming for security and compliance.
- Designed and implemented observability & monitoring dashboards for backend API and AI system health using Prometheus, Grafana, and AWS CloudWatch.
- Validated and optimized backend API applications for performance, security, and scalability.
- Collaborated with AI/ML engineers to ensure model outputs meet quality and enterprise compliance standards

Search Ads

Audit Service: Audit Service is one of the Demand Side Applications which enables SearchAds Business to be legally Compliant by providing chronological record of system events performed by Customers/Apple Internal Users. In addition, Audit Service also helps SearchAds business adhere to mandatory Sox Compliance audit assessments by curating the financial records. Document Service: Doc Service provides secure storage for storing various media and its metadata. It provides API interface for upload, download, metadata update, search etc. and ancillary functionality like state management, cleanup. Presently Doc Service Stores Search Ads documents (ENTITY or INDUSTRY licenses) and News creatives which are served to News Clients. It helps consumers manage the Lifecyle of the uploaded assets and notifies downstream systems about updates. Display Service: News Work bench is a Campaign, Targeting and Ad Management Portal which enables its Demand Partners to create and manage their campaigns,

MM21

Multimedia software 21 is provide user to create account in TME (Toyota motor Europe) and register yourself as owner and provide smart option to set preferences like sitting style, AC temperature etc. Also give an option to register as co-owner with customized access. Provide the facility to login in other Vehicle with same credentials and get the preferences to feel like your own vehicle.

944 Days

Sirius Programmer, Host App

Sirius Programmer" development project of Medtronic, is a programmer application for cardiac implant devices. The application is used to program the implant device. Application is developed using proprietary Domain Specific Language (DSL) and runs on Android and iOS.

610 Days

Smart Client ,Fusion Server

Designed JSPs as per the requirements. Involved in writing Action Classes, Tiles and Validations. Update Struts configuration document, validation document. Responsible for writing Hibernate DAOs and their implementations. Written Hibernate Mapping Documents and Persistence Classes.

80 Days

Know Your Provider (KYPScreening,Monitoring)

KYP makes provider screening a completely "paperless" process and maximizes the automation through its enterprise-class and proven software solution • Delivers compliance with ACA requirement for monthly verification against LEIE and SAM exclusion lists • Minimizes risk by continuously checking status of other important provider attributes • Enhances user efficiency by up to 90% through automation • Delivers tangible Return on Investment (ROI) through fraud prevention (identifying 2 — 3 times more ineligible providers) • Minimizes manual effort and the resulting errors

4 Months

Custom LLM

- Working on LLM-based enterprise project focusing on LLM red teaming for security and compliance.
- Designed and implemented observability & monitoring dashboards for backend API and AI system health using Prometheus, Grafana, and AWS CloudWatch.
- Validated and optimized backend API applications for performance, security, and scalability.
- Collaborated with AI/ML engineers to ensure model outputs meet quality and enterprise compliance standards
